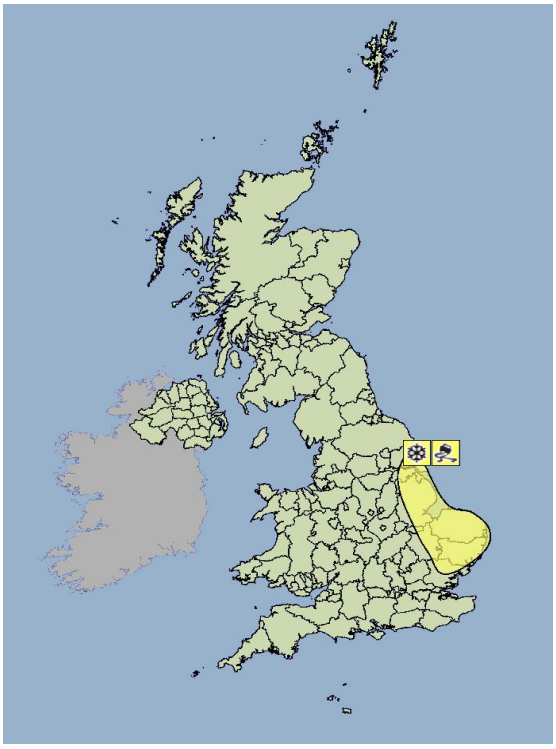
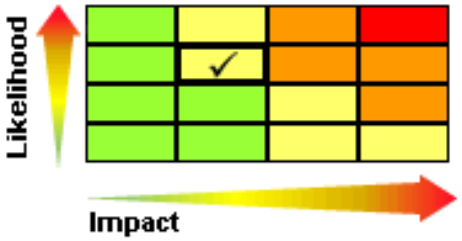
National Severe Weather Warning Service





Chief Forecasters Assessment
A band of sleet and snow will turn more showery overnight but with some heavier bursts possible, especially over East Anglia. 1-4 cm of snow is possible in places, though rain and sleet may occur along coasts. Ice may be the more widespread hazard.

The Met Office have issued a **Yellow Warning** of **Snow and Ice**

Valid from **15:00 on Tue, 06th Feb 2018** until **09:30 on Wed, 07th Feb 2018**

Sleet and snow showers will affect parts of eastern England later on Tuesday and for a time overnight, when clearing skies will lead to ice forming in places, lasting into Wednesday morning.

Expect some delays to travel, while untreated surfaces become icy leading to an increased risk of accidents or injuries.
